

## Cash Automation™

An End-to-End Solution for Cash  
Dispensers and Recyclers

## Are you leveraging the full value of cash dispensers and recyclers?

### BUSINESS VALUE

- ▶ Enhance Service
- ▶ Save Money
- ▶ Improve Operations

### COMPATIBILITY

- ▶ Episys®

Counting cash at a teller window can be tedious and inaccurate. While there is no lack of cash automation solutions on the market, only one is fully integrated with your Episys® core system. Symitar's Cash Automation module, working in tandem with the CFMS4 application server from Cash Flow Management, Inc.™ (CFM), brings the entire world of automated cash management to you!

### IT WORKS LIKE THIS ...

Cash Automation is an Episys module designed to integrate with the CFMS4 application server from CFM, the leading software provider dedicated to servicing financial institutions, core software providers, and cash automation hardware manufacturers. The new module coupled with CFMS4 provides near-real-time cash transactions via all major makes and models of cash dispensers and cash recyclers from the United States and Europe.

### A CUT ABOVE THE REST...

The only solution of its kind, CFM with Symitar allows credit unions to seamlessly integrate their Episys core with the CFM automated cash management system. This industry first, enterprise solution drives and manages all cash automation for your credit union, allowing you to choose which cash dispenser and recycler hardware best fits your needs. Cash Automation logs all communications from Episys to CFMS4, and CFMS4 to the dispenser or recycler.

### NEAR-REAL-TIME CASH COUNTS AND TRANSACTION HISTORY...

Cash Automation and CFMS4 connect directly to Episys, eliminating lag time often created between transactions and the posting. Once the transaction finalizes, it posts in near real time. Your tellers are also presented with an improved inventory system; never again will they wonder how much money is in their drawer.

An automated cash dispenser and recycler system also allows credit unions to track cash transaction history. This historical data will help manage your cash flow and transaction device usage. How much money is needed on a pay-day Friday, compared to a Tuesday morning? With Cash Automation's intuitive reporting tools, you will know how to stock your teller drawers on different days during different times of the year.

### IMPROVED SERVICE FOR YOUR MEMBERS...

Cash Automation with CFM allows your tellers to focus on the member. This module increases the balancing speed and enhances transaction efficiency. With automated recyclers, tellers no longer have to take time counting money in front of the members. In the unlikely event that there is a problem CFM provides precise, efficient troubleshooting that is accessed through CFM's Helpdesk module. With this information available from an enterprise position, you and your members can quickly reach a resolution while increasing uptime.

### WHAT IT DOES:

- ▶ Integrates with all major makes and models of cash dispensers and cash recyclers
- ▶ Drives and manages all cash automation
- ▶ Provides precise and efficient troubleshooting
- ▶ Posts transactions in near real time
- ▶ Allows for enterprise based reporting

### WHAT IT DOES FOR YOU:

- ▶ Allows credit unions to choose which cash dispenser and recycler hardware best fits their needs
- ▶ Improves cash inventory system
- ▶ Increases teller efficiency
- ▶ Provides access to current and historical data for cash flow and device usage
