# Symitar® EASE™

The Episys® Outsourced Solution

Symitar®
A JACK HENRY COMPANY

# Have you considered how easy outsourcing your core processing system can be?

## BUSINESS VALUE

‣ Save Money

‣ Improve Operations

## COMPATIBILITY

‣ Episys®

Driven by the need to lower cost, increase efficiency, and save money, credit unions are setting their sights on an outsourced solution as an alternative delivery model. Each credit union's culture and strategy determine whether it uses in-house deployment or outsourcing for its core processing system. For credit unions leaning toward outsourcing, Symitar can get you there with EASE.

### IT WORKS LIKE THIS...
With EASE, credit unions benefit from Symitar's extensive infrastructure and sophisticated processing environment. EASE lets credit unions eliminate both the capital expenditures required for in-house installations and the need for employee resources to operate and manage in-house hardware and software. In addition to providing secure access to the Episys core data processing platform, Symitar EASE incorporates the latest in blade server and SANbased data storage technology.

### THE POWER OF EPISYS WITHOUT THE ADDED LEGWORK...
EASE provides credit unions the ability to focus on their core competencies with seamless access to advancing technology, strict regulatory compliance, and ongoing access to industry, technology, and security experts. Using EASE, credit unions can quickly introduce new member- and market-driven products and services. They also have on-demand access to more than 50 integrated complementary products and services. Additionally, an outsourced deployment means that credit unions receive the full benefit of ongoing, client-driven enhancements to the Episys processing system.

### PUT THE FOCUS BACK WHERE IT BELONGS...
If a credit union later decides to transition from outsourced to in-house deployment of Episys, this process can be handled without conversion. EASE clients also have a dedicated customer relationship manager as a single point of contact for inquiries and service.

### WHAT IT DOES:

‣ Provides access to core Episys functionality that is identical to in-house installations

‣ Delivers on-demand access to over 50 integrated complementary products and services

‣ Provides access to the latest Episys releases and upgrades

‣ Incorporates strict regulatory compliance, ongoing security support, and disaster recovery capabilities

‣ Offers conversion-free migration to in-house deployment

### WHAT IT DOES FOR YOU:

‣ Lets you manage your core data processing as an operational expense rather than a capital investment

‣ Frees financial and personnel resources to use elsewhere in your operations

‣ Reduces the time to deploy the Episys platform

‣ Enables you to quickly introduce new member- and market-driven products and services

‣ Frees you to focus on your core competencies
