PowerOn®

Enables Virtually Unlimited Episys® Customization

Would you like to modify your core processing system to meet the unique needs of your credit union?

BUSINESS VALUE

‣ Save Money

‣ Improve Operations

‣ Enhance Service

COMPATIBILITY

‣ Episys®

PowerOn is Symitar's sophisticated utility that enhances the functionality of the Episys core system with the ability to customize. This product enables credit unions to respond to evolving business requirements, reduce operating costs, increase productivity, decrease errors, and adapt to user preferences.

CREATE YOUR OWN TOOLS, SCREENS, AND APPLICATIONS

PowerOn puts your credit union in the driver's seat by enabling IT staff to develop tools and automate manual tasks. You can design the look and feel of data screens using scripting languages and HTML. You can also create user-defined inquiries for data mining. PowerOn gives you the ability to develop interfaces with other systems, and to integrate data from multiple sources. It can be used to validate data entry and transactions. These changes are made within the structure and protection of the core system, but independent of the core code. The goal is to give credit unions maximum freedom to adapt the core platform to their requirements.

YOU ARE ONLY LIMITED BY YOUR IMAGINATION …

Symitar realizes that you know the particular needs of your staff and members better than anyone. This product lets you create custom reports, forms, email, and other member correspondence on demand. You can use PowerOn to streamline the input and processing of data from external sources. Discover what unlimited customization of Episys can do for your institution.

PowerOn puts your credit union in the driver's seat by enabling IT staff to develop tools and automate tasks.

WHAT IT DOES:

‣ Enables virtually unlimited customization of Episys.

‣ Supports the development of userdefined queries and inquiry screens.
