

SymConnect™

Maximizes the Power and Flexibility of Episys®

Would you like to easily connect Episys to third-party applications?

BUSINESS VALUE

- Enhance Service
- Improve Operations

COMPATIBILITY

- Episys®

Symitar's SymConnect is an interface that enables third-party vendors and your credit union to access Episys core data and business rules.

Using a standard application programming interface (API), SymConnect serves as a secure middleware component between the Episys host, Symitar® complementary products, and third-party products.

SymConnect supports interactive data exchanges. In addition, this widely used, industry-tested solution effectively manages any user interface such as a third-party product that transacts with, inquires, and maintains member accounts. The SymConnect support of the complementary applications or third-party products strictly maintains the integrity of Episys-based account data and compliance standards.

This solution maximizes the power and operating flexibility of the Episys core system. SymConnect can eliminate the costly custom programming often required to integrate multiple third-party and complementary applications to core systems.

SymConnect is another strategic system feature that enhances the functionality and ease-of-use of Episys.

WHAT IT DOES:

- Seamlessly connects third-party and internally developed ancillary applications with Episys.
- Supports third-party products that handle monetary transactions, inquiries and file maintenance on member accounts.
- Uses a published application programming interface (API).
- Supports interactive data exchanges between Episys and ancillary applications.
- Maintains the integrity of core system data, established security controls, and compliance standards.

WHAT IT DOES FOR YOU:

- Maximizes the power and operating flexibility of Episys.
- Leverages existing technology solutions with secure, compliant and proven connectivity.
- Maintains the integrity of core system data.
- Enforces established security controls and compliance standards.
- Eliminates costly customization or integration initiatives.
- Gives you access to more than 150 applications that vendors created specifically to work with SymConnect.
