

Bankruptcy Scripted FM

Capture bankruptcy data in tracking records

BUSINESS VALUE

- Save Money
- Improve Operations

COMPATIBILITY

- Episys®

This product is part of Symitar's Collections Toolkit (CTK). It provides near real-time capture of bankruptcy information for each share or loan involved in the bankruptcy.

IT WORKS LIKE THIS ...

CTK Bankruptcy Scripted FM provides an HTML screen interface that enables users to capture and maintain bankruptcy data in a share or loan tracking record. It creates Collection Work Card and Collection Work Card Note records. It also adds and removes account, share, and level warnings, as well as account comments. CTK Bankruptcy Scripted FM updates share and loan credit reporting fields, along with statement mail codes.

WHAT IT DOES:

- Provides near-real-time capture and maintenance of bankruptcy data for each share or loan
- Creates Collection Work Card and Collection Work Card Note records
- Create share/loan level tracking records to store the information related to the bankruptcy
- Adds and removes account, share, and level warnings, as well as account comments
- Updates share and loan reporting fields, as well as statement mail codes

WHAT IT DOES FOR ME:

- Simplifies collections by quickly and clearly presenting relevant data
- Saves time and labor by creating records and updating fields

Get the benefits of faster workflow, address accuracy, and reduced postal error expenses - jhaAddress Verify.
