

Episys® ID Scanner Interface™
Capture Member IDs Quickly and Efficiently

Would you like the ability to scan identification data and automatically save the records in Episys®?

BUSINESS VALUE

- ▶ Improve Operations
- ▶ Enhance Service

COMPATIBILITY

- ▶ Episys®

Eliminate the need for staff to type new or updated ID information while simultaneously reducing errors.

IT WORKS LIKE THIS...

Episys ID Scanner Interface is a plug-and-play module that connects seamlessly to Episys. It can be accessed as a standalone application or initiated with a PowerOn® script to integrate with other Symitar® optical solutions. Using commonly available scanners, the program captures data from driver's licenses and passports. This data populates fields in Episys or other applications, reducing staff keystrokes and errors.

DATA AND SCANNERS ...

Episys ID Scanner Interface extracts the following information:

- | | | |
|-----------------|-----------------|---------------------------|
| ▶ First name | ▶ Date of birth | ▶ Country |
| ▶ Middle name | ▶ Sex | ▶ Nationality |
| ▶ Last name | ▶ Address 1 | ▶ Driver's license number |
| ▶ Name suffix | ▶ Address 2 | ▶ Passport number |
| ▶ Issue date | ▶ City | ▶ Personal number |
| ▶ Issuing state | ▶ State | |
| ▶ Expire date | ▶ Zip | |

SUPPORTED SCANNERS

- ▶ IDscan 800N*. Imaging for picture ID only.
- ▶ IDscan 800R* or older 800 versions. Imaging and data from driver's licenses.
- ▶ IDscan 1000*. Imaging and data from driver's licenses and passports.
- ▶ Snapshell Passport
- ▶ Epson TM-S9000**

*This scanner is image only and has no optical character recognition (OCR).

** Supports OCR with per-device license key or license dongle from Acuant.

WHAT IT DOES:

- ▶ Quickly and accurately captures member information from driver's licenses and passports.
- ▶ Integrates with Episys and other Symitar solutions through a plug-and-play architecture.

WHAT IT DOES FOR YOU:

- ▶ Increases efficiency by enabling easy, one-step member ID processing.
- ▶ Reduces errors caused by re-typing information.
- ▶ Strengthens regulatory compliance by providing a standardized and automated ID capture process.
